

KESHAR JAHAN

JAVA BACKEND DEVELOPER | JAVA | SPRING BOOT | MICROSERVICES

kjkm13061996@gmail.com || +91-8287014113 || [LinkedIn](#) || [GitHub](#)

PROFESSIONAL SUMMARY

Java Backend Developer with around 2 years of experience in Java backend development. Experienced in Java, Spring Boot, REST APIs, Hibernate/JPA, JDBC and PostgreSQL. Hands-on experience in developing backend services, implementing business logic, database operations, third-party API integration, API testing, debugging and production issue resolution in the FinTech domain. Hands-on experience with Microservices, Spring Cloud, Eureka, API Gateway, OpenFeign, Spring Security, JWT and AWS.

WORK EXPERIENCE

Jan 2025 - Present

FintechSmartSolutions (NBFC) | Jan 2025 – Present
BACKEND DEVELOPER

- Developed and maintained Spring Boot microservices for customer and loan-management workflows.
- Developed and maintained RESTful APIs for customer and loan-management operations.
- Implemented Spring Security and JWT-based authentication and authorization to secure REST APIs.
- Implemented API Gateway for centralized request routing and service access.
- Implemented Eureka Service Discovery for dynamic service registration and discovery.
- Implemented OpenFeign for inter-service communication between microservices.
- Integrated AWS services for application storage and deployment requirements.
- Worked with CI/CD pipelines for automated build, testing and deployment.
- Used Git and Maven for version control and project build management.

PROJECT

LOAN MANAGEMENT SYSTEM (LMS) – FINTECH / NBFC

Domain: FinTech | NBFC | Banking & Financial Services | Consumer Lending

Technologies: Java, Spring Boot, Microservices, REST APIs, Spring Security, JWT, Spring Data JPA, Hibernate, JDBC, PostgreSQL, Kafka, Docker, Eureka, API Gateway, OpenFeign, AWS, Git, Maven, Postman

Project Description:

Developed and maintained backend functionality for a Loan Management System (LMS) in a FinTech/NBFC environment for payday-loan operations. The platform manages customer and loan-processing workflows from application through verification, approval, disbursement, and repayment.

Key Responsibilities

- Developed and maintained RESTful APIs for customer and loan-management workflows.
- Implemented backend business logic using Java and Spring Boot.
- Worked on customer onboarding, loan application, verification, approval, disbursement, and repayment workflows.
- Performed database operations using Hibernate/JPA, JDBC, and MySQL.
- Integrated third-party APIs for financial and verification workflows.
- Investigated and resolved backend and production issues.
- Tested and debugged APIs using Postman.

EDUCATION

Bachelor of Computer Applications (BCA)

Amity University | Completed

Master of Computer Applications (MCA) – Pursuing (2026)

TECHNICAL SKILLS

- Languages: Java, SQL
- Backend: Spring Boot, Spring MVC, REST APIs, Spring Data JPA, Hibernate, JDBC
- Microservices: Microservices, Spring Cloud, Eureka, API Gateway, OpenFeign
- Security: Spring Security, JWT, Authentication, Authorization
- Databases: PostgreSQL, MySQL
- Messaging: Kafka
- Cloud & DevOps: AWS, Docker, Git, GitHub, Maven, CI/CD
- Testing & API Tools: Postman, Swagger/OpenAPI
- Core Java: OOP, Collections, Exception Handling, Java 8, Streams, Lambda

CERTIFICATIONS & TRAINING

Technical Training

- Ducat — Java / Backend Development Training
- Croma Campus — Java / Spring Boot Training
- CETPA Infotech — Java / Software Development Training

ADVANCE SALARY

JAVA DEVELOPER INTERN

Advance Salary | 6 Months

- Developed backend functionality using Java and Spring Boot.
- Developed and tested REST APIs for application workflows.
- Implemented backend business logic and database operations using MySQL.
- Worked with Spring Boot, REST APIs and MySQL for backend development.
- Performed API testing and debugging using Postman.
- Investigated and fixed backend issues during development.
